KEEPING COOL.

Summer Suggestions Make Topic for
Norwich Grange Meeting.

The August session of Norwich
grange, No. 12, and of District No. 1,
held in Pythian hall Wednesday eve-
ning, was one of much interest, making
up in quality what it perhaps lacked
in quantity. The session was devoted
on Keeping Cool was the timely topic
presented for discussion by the worthy
lecturer, Mrs. Maud E. Bliss, and the
subject was ably handled by the
speakers. There was a reading by Ed-
ward Cook, and then Woodbury O. Ro-
gers took up the matter of keeping cool
in an enlightening manner. Mrs. John
E. Fanning gave useful hints as to how
to arrange a living room to get a cool
effect during the summer time. After
others had spoken, ice cream was served
as a practical example of one way
to keep cool.
These promises to be a good repre-
sentation of Norwich grange members
at the New London County Pomona
grange meeting at Preston City next
Thursday.

Chinese Finesse.

The general comment that the ex-
ecution of Chinese agreement to the
Russo-Japanese treaty settles any dis-
pute over the matter is based on the
bare statement that such an assent
has been conveyed. It has been said
for some time the well-founded belief that
what China wishes about Manchuria,
of which she is the titular sovereign,
makes no difference to the powers that
have their grip on the territory.
But the Chinese government in its
reply exhibited the calm elusiveness
which marks its acceptance of the treaty.
It reserves the right that she may
in the future, in other words,
she accepts the treaty specifying that
it reaffirms the provisions of the treaty
of Portsmouth. When it is recalled
that this treaty conferred the territory
"entirely and completely the exclu-
sive administration of all parts of
Manchuria" excepting the territory
comprised within the lease of the Liao
tung peninsula, it is plain that this
provision certainly cannot hamper
China's desire to occupy the territory
and construct railroads through the
other parts of that country—Pittsburg
Despatch.

Smoke.

Don't imagine next time you see in
weather promising storm that a
"heavy" stratum of air is forcing the
smoke of your chimney to the ground.
Instead, the condition is the opposite
and the atmosphere is too light to al-
low the smoke to rise. To prove this
fact in this vacation season, fill your
mouth full of tobacco smoke and dive
in twenty feet of water, releasing the
smoke. The smoke appears from the
water almost instantly. You may say
it comes up in air bubbles, but this
does no more than prove the theory.
Your chimney smoke won't rise, be-
cause there isn't buoyancy enough in
the stratum to raise it. —Chicago
Tribune.
